Notes:

1. In general, all forward or backward steps taken in BJO or SCAR should be taken using Contra Body Movement with Contra Body Movement Position of the feet. Therefore, no references to CBM or CBMP are noted in the fine print.
2. 1st plus figure (right lunge roll and slip) is deconstructed to stretch over two measures.
3. 2nd plus figure (reverse fallaway slip) is deconstructed into standard phase IV figure reverse fallaway – the slip is incorporated into an unphased slip hesitation. For the slip hesitation the man is essentially doing the woman's part of a drag hesitation.
4. Contra twinkle is 2nd unphased figure. Using standard twinkle but with same footwork – akin to contra bota fogas to be consistent with existing RAL cueing nomenclature.
5. ** Lady may prefer not to use all of the steps for the unwind. Timing to Ending meas 7-8 for lady can be 1, 2a, 3, 4, 5, 6 ; ; or 1, 2, 3, 4, 5, - ; ; AND the ending alignment really doesn't matter – this will really depend on how many and how large the woman's steps are. Choreographer put side closes in the fine print because this is a bit easier for the lady to use the syncopation but if lady prefers passing (running) steps that works too – but this might have more of a horse and cart type of movement and may result in a full 1-1/2 rotation of the man. Play with it and decide how you want to dance these two measures.
